

WATER PRESSURE TANK FILLING 100% NITROGEN (N₂)

SAVE 15% OF PUMP CIRCLE AND ELECTRICITY ANNUALLY.

WHY USE NITROGEN?

Nitrogen is less likely to migrate through diaphragm than oxygen, which means no need to refill the air pressure during service.

Nitrogen is a very stable gas. No pressure changes against with temperature change.

429 No. 36, Ln. 212, Sec 1, Hemu Rd.
